Skills

Great listener, respectful, focused, empathic. Javascript developer.

Experience

FDTE/Provu / Workflow Developer

JUNE 2021 - PRESENT

- Maintenance of legacy code and creation of new features for the proprietary internal software - called Flowbuild - for managing workflows and processes, using Javascript;
- Participated in the creation of the Flowbuild documentation;
- Introduced new patterns when developing with Flowbuild (through a presentation to the company)
- Act as assistant to tech lead, coordinating team members during tasks and proposing solutions for the projects and participating in meetings on his behalf;
- Help new team members, demonstrating our flow of work and introducing our technologies;
- Test new features of the company, proposing new features and changes;
- Collected data and made a study regarding the performance of our application utilizing Postman's test solutions.

Education

UNESC - Centro Universitário do Espírito Santo / BA in Civil Engineering

2011 - 2017

University of Manitoba /Sandwich Degree

2014 - 2015

I earned a scholarship through the Science Without Borders Program and got the opportunity to study English and part of my graduation in University of Manitoba - Winnipeg/MB. Besides the Intensive English Program and regular classes, I participated in a research project with MSc and Ph.D students.
